

The life aquatic

PHOTOGRAPHY LAUREN BAMFORD

The entire bathroom is tiled, echoing the crystal shine of the deep blue sea. A large skylight beams light through the space, imbuing it with the immersive atmosphere of the ocean.

This bathroom, like the rest of the home, was designed expressly for the owner, an avid scuba diver. Even the spatial planning reveals their personality and values, in a somewhat unconventional way.

Travelling through the house, the visitor gets a sense of the hierarchy of spaces instantaneously. The laundry is conveniently situated so the owner can scrub off without fuss after a session in the bay.

Moving upstairs past the living, dining and courtyard area gives access to bedrooms and a lovely blue bathroom. The entire bathroom is tiled, echoing the crystal shine of the deep blue sea. A large skylight beams light through the space, imbuing it with the immersive atmosphere of the ocean. Open joinery features throughout express only what is needed, without any concern for the unnecessary.

Designed for courageous clients on a very small block of land and an extremely tight budget, this bathroom shines like an underwater gem, revealing the personality of the residents.
